The new black tray material AFFINIS heavy body BLACK EDITION provides excellent readability of the impression when used with gold or silver colored AFFINIS PRECIOUS. The unique color combination displays details even more precisely and supports the qualitative assessment of the impression result.

Visible precision with love for details.

The lamellar structure of the mirror like filler reduces light scattering of the surface which results in a better contrast and readability.

The irregular structure of the standard fillers leads to undirected light scattering at the surface which results in less contrast and inferior readability.

The unique silver and gold pigmentation drastically reduces the light scattering effect and the readability is intensified by maximum color contrast.
**SUPERIOR FLOW PROPERTIES**

AFFINIS® PRECIOUS wash materials have a contact angle of only 10°. Their superior flow properties allow the impression material to easily capture all critical surface detail of the preparations in a wet environment. The unique surface affinity prevents air entrapments and margin distortion.

*For perfect impressions.*

---

**Initial surface affinity on moist dentin**

Defined amount of material on moist dentin surface after 10s.

AFFINIS® PRECIOUS was developed to produce accurate results in the mouth and in the lab. The wettability allows the wet gypsum to flow more easily into the impression, producing more accurate stone models. An accurate model is the key for the lab technician to create properly fitting restorations.

---

**AFFINIS® PRECIOUS regular body**

**AFFINIS® PRECIOUS** flows directly into the sulcus preventing air entrapments.

Thixotropic properties prevent slumping.

The self-contouring consistency and the highly active surfactant agent produces an innovative affinity to the moist tooth structure.

**AFFINIS® PRECIOUS** wash materials produce accurate, void free impressions.
AFFINIS® PERFECT IMPRESSIONS

**AFFINIS® heavy body**
Single Package

- 2x 380 ml heavy body BLACK EDITION
- 1 x Fixation Ring
- 2x 75 ml = 4 IMPRESSIONS

**AFFINIS® System 360 heavy body**
Starter Kit

- 1x 380 ml heavy body BLACK EDITION
